

The Number of the Beast

By: Kevin Heckle

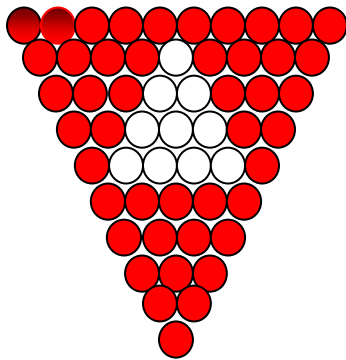

Revelation 13:18 Here is wisdom. Let him that hath understanding count the number of the beast: for it is the number of a man; and his number is Six hundred threescore and six.

I would first like to acknowledge Vernon Jenkins, Bob Ware and John Tng in the discovery of certain Gematrias, numbers, etc. that I may repeat here. Since the beginning of my researching the Number of the Beast, I have believed that John (the beloved of Jesus) when referring to 666 that the number was in the triangular form. Most people are familiar with squares and cubes which are helpful in measurement, but are less familiar with other figurate numbers such as triangular numbers that are helpful in counting. As I've noted before, the word COUNT in this passage of Scripture is the Greek word *PSEPHIZO (G5585)* which means to COUNT BY THE USE OF PEBBLES.

Just 20 miles to the north of Patmos, where John wrote the Book of Revelation in captivity, is the island of Samos. Samos is the birth place of Pythagoras who was considered the father of math discovering many of the mathematical principles that we use today. Pythagoras, who lived several hundred years before Jesus did, counted by figurate numbers.

Counting large numbers such as a couple of urns full of pebbles (voters threw their stone in one or the other) could easily be reckoned by placing first one pebble, then two pebbles under the one forming a triangle, then three under that and so on until all the pebbles were distributed increasing by one per row. For instance, and this is a small number for example, you could 1 then 2 then 3 then 4 then 5 then 6 then 7 increasing in rows and then finally 8.

$1+2+3+4+5+6+7+8= 36$. Counting large numbers by simply adding would be difficult to keep track. Uniformly setting the pebbles would allow you to only count one side, in this case 8. From there the calculation is easy as you multiply the number of pebbles on a side, by that same number PLUS 1 and then divide the product by two: **$(n \times (n+1))/2$** OR $(8 \times (8 + 1))/2$ OR **(8×9)** **divided by 2** equals **36**. If you arranged pebbles and found that one side had 21 pebbles, its total number would be 231. $(21 \times (21+22))/2 = 231$. You could also memorize the Number – Total combinations and quickly reckon a large total. (see chart below)

This set of pebbles has 10 on one side. $(10 \times (10+1))/2=55$. Its number is **10** and its total is **55**. **55** is the **10th**. **666** is the **36th**, **171** is the **18th** **(6+6+6)** and so on.

The PERIMETER pebbles can be counted by adding the 1st side $+(2^{\text{nd}} \text{ side} - 1) + (3^{\text{rd}} \text{ side} - 2)$ OR in this case $10+9+8=27$ for the perimeter.

For each triangle of pebbles, exactly 3 SATELLITE triangles can be formed using half of the pebbles on one side as its number. IF the side is an odd number, one will be left in the center of the side which will be the tip of the CORE triangle. In this case, the 3 SATELLITES have **15** pebbles (totaling **45**) and the remaining CORE is what is left over $(55-45=10)$. **For each triangular number there can only be ONE value for the three equal satellites and ONE value for the core.**

As you will see below, I believe that the mystery number 666 and its meaning has been solved! The illustrations of the triangles below show the **ONLY NUMBERS POSSIBLE FOR EACH, INCLUDING IT'S THREE SATELLITES AND CORE. THEY CAN BE NO OTHER NUMBERS!** First looking at the number (**36**) of the beast **666**, you will see that the three satellite numbers are **171** totaling 513 and at the core of 666 is the other mystery number penned by John describing the number of fish caught (153) after Jesus resurrection. In Revelation **17:11**, the antichrist is described as the **8th**. **666** is the **36th**, is the **8th** Triangular number. 513 (**171** total) is a permutation of 153. $513+153=666$.

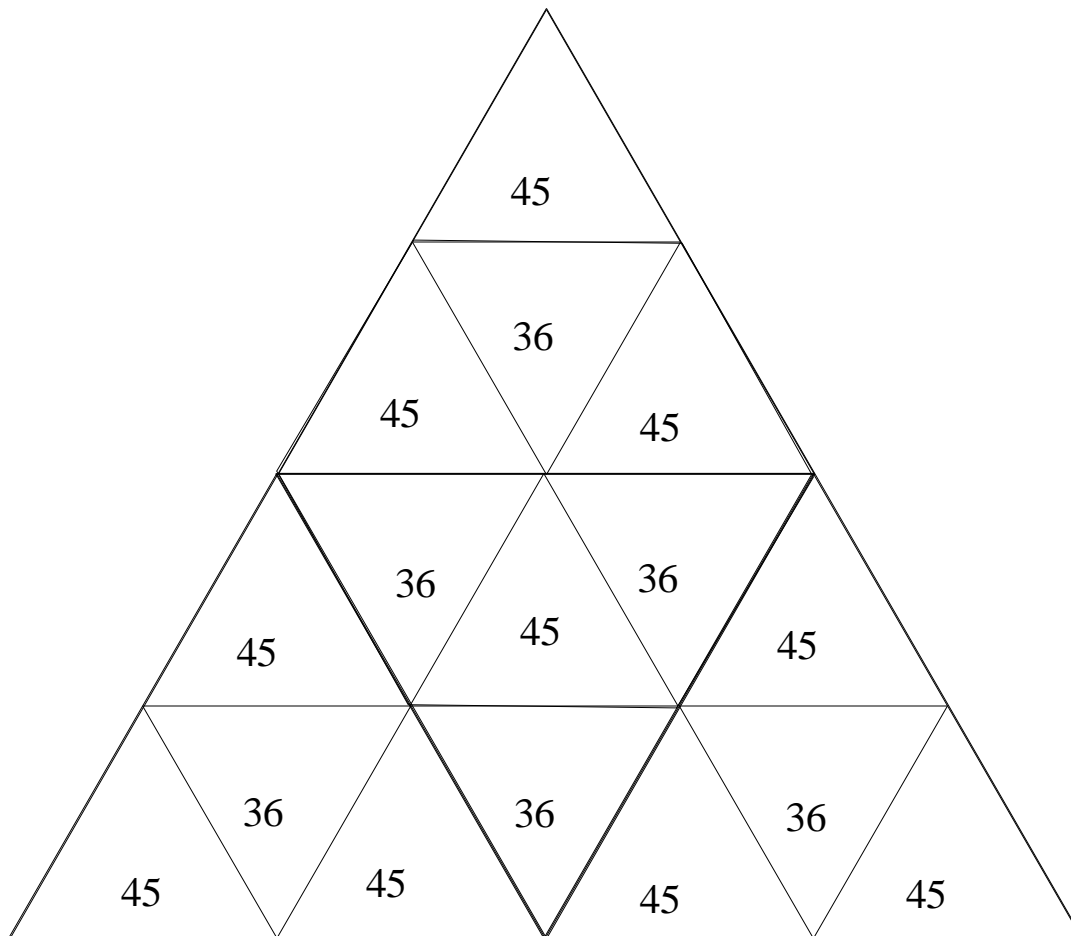

THE ORDINAL 1-1 (simplest system) value of BARRY SOETORO is 171! REMEMBER, 171 is the ONLY NUMBER THAT CAN BE A SATELLITE OF 666. 153 is the SUM of 36 (Ordinal 1-1) and 117 (Standard Method) of BARACK ($36+117=153$)!!! 117 is a permutation of 171, the other being 711, ALL DISPLAYED IN THE CHAPTER AND VERSE DIGITS OF

REVELATION 17:11! Remember, 7-11 was BARACK's 73rd DAY in which he said he would REST! MORE ON THE 73rd LATER!!!!

Let's break it down a little more: One side of the 666 pebble triangle has 36 stones, which is also the 8th triangular number. To find the perimeter of the 666 Triangle you can add $36+35+34$ equaling 105. 105 is triangular number 14. 14 is the (Reduced Standard) Gematria value of OBAMA!!! 36 (side) is the 8th triangle number. $36+8=44$ -(BHO is the 44th PRES!) 105 (whole perimeter) is the 14th triangle number. $105+14=119$. Adding those 4 numbers: $8+36+14+105 = 163$, a prime number. 163 is the (Ordinal 1-1) value of BARACK HUSSEIN OBAMA! It can be NO OTHER NUMBER!!!

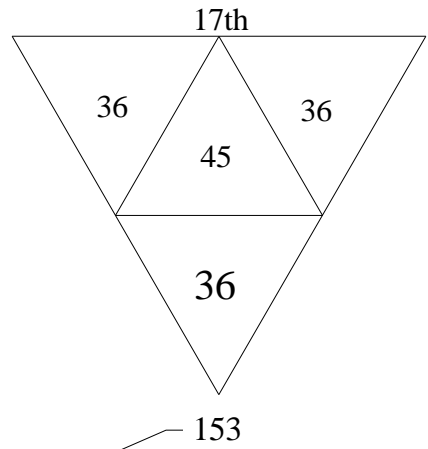

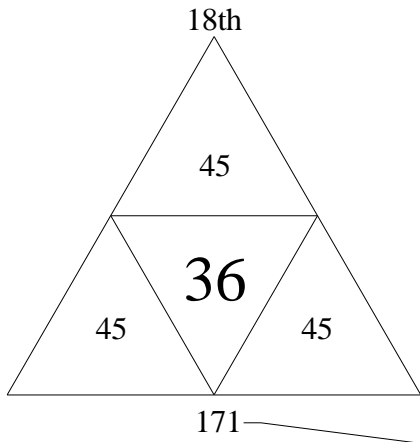

Now let's break it down a little more: The satellites of 171 and the core of 153 can be broken down to smaller triangles. The three 171 triangles (18th Triangle $6+6+6$) in which the gematria of BARRY SOETORO occurs 3 times can be broken down to three satellites having 45 pebbles each and one core having 36. The CORE number of 153 is just the opposite in that it has three satellites with 36 and a core of 45. There are a total of ten 45 pebble Tri. and a total of six 36 pebble triangles OR 450 and 216. $450+216=666$. 216 ($6 \times 6 \times 6$) is the day of BARACK's birth and the Ordinal 6-6 value of his name. In essence, the Gematria of BARACK occurs SIX TIMES on the triangular number of 666 totaling the CUBE OF 6 which is 216! IT CAN BE NO OTHER NUMBER! The Bible says that 666 is the number of a MAN. 45 is the HEBREW GEMATRIA VALUE OF MAN (adam)!!!!!!! 45 occurs ten times for a total of 450. The SUM of it and 216 is of course 666. However, the difference between 450 and 216 is 234!!!!!!!!!!!!!! 234 is $117 + 117$ OR BARACK x II (He is a junior)!!!!!! As you may know, 234 is also the product of 13×18 as in Revelation 13:18 and the 6th prime (13) x ($6+6+6$) 18. If you consider that 153 has three 36 triangles or that the satellites have a total of three 36 triangles, the

gematria value of BARACK OF HAWAII (108) occurs twice on the 666 Triangle!!!! IT CAN BE NO OTHER NUMBER!!!

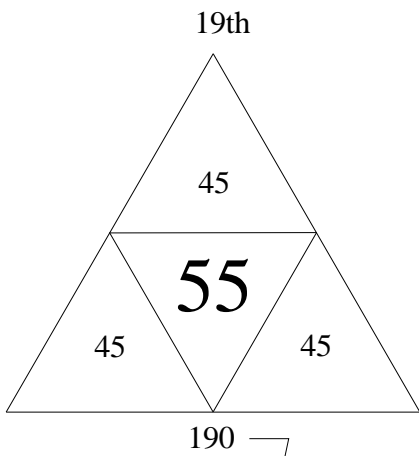

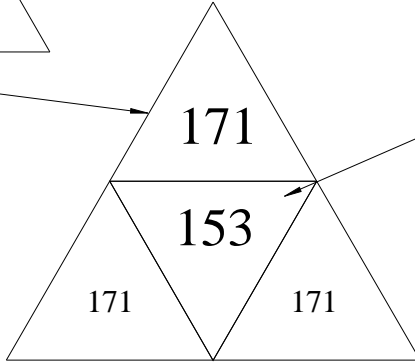

666

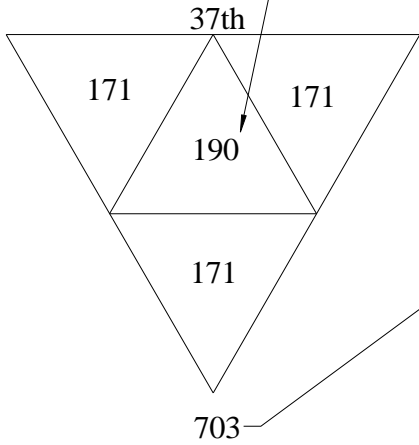

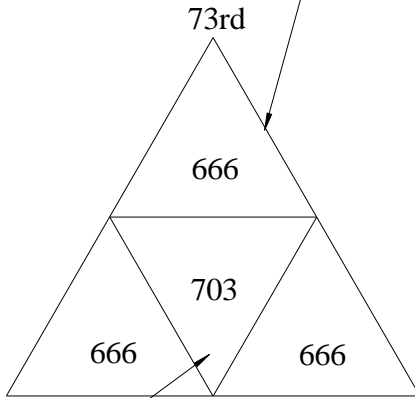

One more thing about 36 (BARACK), the singular word SATAN appears 36 times in the NEW TESTAMENT and then the 37th time in Rev. 2:13 (13 is the 6th prime) as a possessive (Satan's). $36 \times 37 = 1332$. $1332/2 = 666$! What is interesting about the slight variation making a total of 37 times is consideration of the 37th Triangle number 703! 703 has the same satellites (BARRY SOETORO's 171) as 666 does but a different CORE, which is 190. (see illustration below). The word SATAN occurs a total of 56 times in the BIBLE. BARACK is in the 56th TERM OF PRESIDENCY.

36th

666

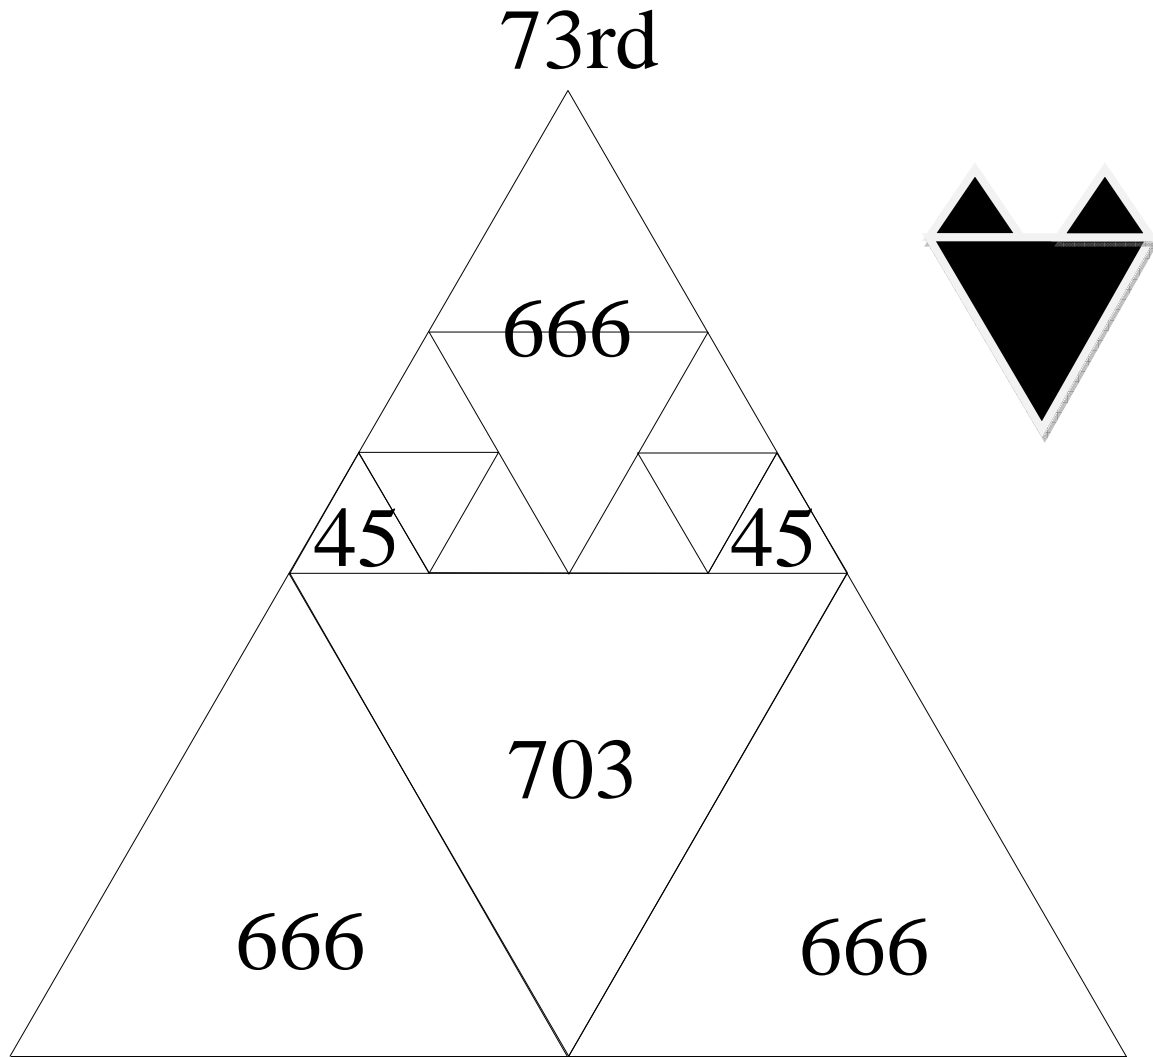

Considering that BARACK recently said that he would finish his work on his SECOND 72nd day and REST on the 73rd, I decided to see if 666 occurred a SECOND TIME in Triangular numbers. GUESS WHAT? 666 is the satellites in both the 72nd and the 73rd Triangular Numbers!!!!!! It doesn't occur again. BARRY SOETORO, BARACK and BARACK OF HAWAII OCCUR THREE FOLD in the satellites of the 72nd and the 73rd. Resting on the 73rd is of utmost rarity! The sum of the 72nd (2628) and 73rd (2701) is 5329. $5329/666$ is the EIGHTH ORDER OF 666 and a EIGHTH!!!!!!!!!!!!!! $5329/8 = 666.125$. Remember, the antichrist is the EIGHTH.

$37 \times 73 = 2701$. 2701 is the Gematria value of the first seven words of the BIBLE (Bob Ware). I believe the 8th word has a Gematria value of 302, which is also the HEBREW value of BARACK.

Getting back to the 73rd triangular number, it has three satellites of 666 totaling 1998 and a core of 703 (37th). Breaking down 703 into its smaller parts, you will find that it too has 171 (BARRY SOETORO) as the satellites, but a different number 190 as the core. Reducing the core 190 (19th) to its parts has three 45 pebble triangles as satellites and 55 as a core. 45 is the Hebrew value for MAN (adam) and 55 is both the Hebrew and English Ordinal value of SATAN. So at the very center of the CORE of the 73rd triangle is SATAN (55) with MAN(45) orbiting. Did I tell you that 55 is also HEBREW VALUE OF OBAMA!!!!!!!!!!!!!! Is he a man who understands DARK SENTENCES (resting on the 73rd) or what?

Finally, there is the Beast with 2 Horns totaling 793 (the opposite of Jeshua 397). 793 is the Standard Vale of BARACK HUSSEIN OBAMA!

2701

Friend in Christ,

Kevin Heckle

P.S. The perimeter of the 73rd is 216, the Ordinal 6-6 value of BARACK!
